typh0nn.github.io – Power BI portfolio

 Adrian Skorupka

PROFESSIONAL SUMMARY

Master Data and Business Intelligence leader with 8+ years of experience building and leading international data teams across global FMCG and consulting organisations. Led a regional Customer Service Master Data team across four European markets reporting directly to the VP Supply Chain Europe, and a team of 5 delivering a global Power BI programme covering 70+ markets, generating 450+ views daily for over 300 stakeholders. Combines hands-on technical depth in Power BI, SQL, SAP S/4HANA and Databricks with process standardisation, data governance and digital transformation delivery.

TECHNICAL SKILLS

Leadership & Delivery: team leadership (5 direct reports), talent development, stakeholder management, cross-functional programme delivery, digital transformation, LEAN, Agile, Scrum, Six Sigma, process mapping

Business Intelligence: Power BI (DAX, Power Query, composite models, row-level security), SAP Analytics Cloud, data visualization, KPI frameworks, report design, dashboard development

Data & Cloud: SQL, Azure SQL Data Warehouse, Azure Analysis Services, Databricks, data modelling, ETL, data warehousing, data integration

Master Data & ERP: SAP S/4HANA, SAP ERP, SAP Ariba, SAP SuccessFactors, master data governance, data quality, data validation, single source of truth, product data management

AI & Automation: Python, Claude API, OpenAI API, DeepSeek, Ollama, LangGraph, CrewAI, Pydantic, FastAPI, Playwright, n8n, MCP, Docker, Cloudflare, Power Automate

Methods & Tools: LEAN, Agile, Scrum, Six Sigma, process mapping, stakeholder management, SharePoint, Excel, Jira, Kanbanize, Wrike

WORK EXPERIENCE

Independent Consulting / Freelance

Data & AI Consultant | 04/2026 – Present

RESPONSIBILITIES

- Delivering short-cycle consulting engagements in Power BI reporting, data modelling and preparation of structured datasets for AI-driven applications, including work for international clients sourced through freelance platforms.
- Designing and implementing AI agent solutions for clients, including the underlying data layer and production controls — schema design, source consolidation, validation logic, per-call cost tracking and human-in-the-loop approval gates.
- Advising clients on structuring dispersed operational data from ERP, CRM and project management platforms into consistent, analysis-ready models.
- Building dashboards and KPI frameworks translating raw operational data into decision-ready insight for non-technical stakeholders.

ACHIEVEMENTS

- Developed a multi-agent orchestration platform in Python: asynchronous multi-provider LLM layer (Claude, OpenAI, DeepSeek, local Ollama) with retry and timeout handling, LangGraph state-machine orchestration, browser-automation agents and Cloudflare Workers deployment.

- Implemented cost-governance tooling tracking spend per model call against enforced budgets, combined with an LLM-as-judge evaluation layer for automated output quality control.

Coty Inc., Spain

Customer Service Master Data Manager | 11/2025 – 04/2026

RESPONSIBILITIES

- **Strategic Leadership & Governance:** Reporting directly to the VP Supply Chain Europe, leading the regional Customer Service Master Data team across Iberia, Canary Islands, Benelux and Italy to ensure data excellence and supply chain agility.
- **Data Brain & AI Architecture:** Partnering with IT and utilizing Databricks for cross-functional context engineering; developed a unified "Data Brain" and agentic AI frameworks to automate complex reporting and enhance Customer Service response accuracy.
- **Process Standardization:** Leading the harmonization of regional workflows to eliminate operational silos, establishing a unified "single source of truth" for master data across all in-scope markets.
- **Digital Transformation:** Transitioning the regional team from manual processing to automated, data-driven workflows; focusing on technical upskilling in SQL and Power BI to build a high-performing, future-ready organization.

ACHIEVEMENTS

- **Process Mapping Excellence:** Conducted advanced process mapping and standardization for over 300 services provided by the team, significantly increasing operational transparency and service consistency.
- **Strategic AI Integration:** Successfully engineered cross-functional data connections in Databricks, enabling the deployment of AI agents that reduced manual effort in departmental reporting.
- **Automated Validation:** Implemented automated data validation scripts for the Benelux (BNL) and Southern Europe markets, ensuring 100% data readiness before SAP to Databricks migration.

Japan Tobacco International

Master Data Manager | 09/2024 – 10/2025

Marketing & Sales Reporting Team Lead | 04/2023 – 08/2024

M&S Reporting Senior Specialist | 07/2022 – 03/2023

M&S Reporting Specialist | 09/2021 – 06/2022

RESPONSIBILITIES

- Progressed through four roles in four years, from Specialist to Master Data Manager, leading and developing a team of 5 direct reports and championing cross-functional collaboration across markets and functions.
- Directed global data integration and quality initiatives by leading product attribute management, optimizing data mapping processes, and implementing KPI-driven validation strategies — ensuring high data accuracy and enabling impactful business insights across markets and systems. Brought together front-end and back-end data management expertise to streamline data modeling, transformation and standardization processes.
- Oversaw global product definition standards, providing master data cross-functional guidance and ensuring consistent knowledge transfer across teams to drive alignment, accuracy and best practices in data governance.
- Integrated diverse data sources, including market data (shipments, distributor data, sell-in/sell-out via Azure Analysis Services), consumer insights (behavioral trends, switching analysis) and financial data (actuals and planning). Enabled end-to-end visibility by connecting product development in SAP ERP and financial processes in SAP S/4HANA, culminating in advanced analytics via SAP Analytics Cloud.
- Led and inspired a high-performing team of 5 direct reports, driving engagement, fostering talent development and championing cross-functional collaboration to continuously enhance master data operations.
- Built and maintained global reporting structures while driving operational excellence initiatives across M&S, Strategic Insights, IT and Finance functions in Western and Eastern Europe, the Philippines and HQ in Geneva.

ACHIEVEMENTS

- Implemented a new product definition system through the introduction of C-SKU (Commercial Stock Keeping Unit) across all JTI data platforms, enabling seamless data integration and both local and global reporting.
- Successfully led the Global Harmonized Reporting Project under HQ Strategic Insights supervision — a 2-year initiative to develop complex Power BI solutions for 70+ markets, covering financial, retail audit and consumer data. Reports generate 450+ views daily and are actively used by over 300 stakeholders.
- Automated 20+ manual Excel-based processes by developing Power BI composite models connected to a centralized Azure SQL data warehouse — delivering efficiency gains equivalent to 3 FTEs saved.
- Redesigned the Harmonized Report layout, **reducing report loading times by 98%**; led the roll-out and stakeholder negotiations across Austria, Germany, Romania, Bulgaria and further markets.
- Led the migration of 18 Excel-based reports into 30+ Power BI reports for the RoMoBu cluster, **cutting delivery cycles from 2–3 weeks to under one week while the portfolio doubled** — absorbing the scope of two specialists who left mid-project and handling the Nielsen Local → Nielsen Discover migration and RADRS data alignment.
- Built a centralized Power BI web application serving as the **single source of truth for GBS reporting**, with automated stakeholder communications.

- Developed **four direct reports from onboarding into recognised subject-matter experts**, enabling delegation of my full cluster scope and a clean handover when I moved to Master Data. Rated **“Consistently succeeds”** in the 2024 performance review; 360-degree feedback scored 4.2–5.0 across all dimensions, from both my manager and my direct reports.

• Mercer Services Poland (GBS) projects, supporting team development and achieving shared success through effective

Knowledge Management Coordinator | 04/2020 – 08/2021

RESPONSIBILITIES

- SharePoint intranet management: creation, standardization and maintenance of sites, communities and libraries.
- Project management for specialty knowledge base projects across functions.
- Content management and optimization, including web design improvements, formatting and generating internal website metrics, with Power BI reporting for SharePoint search optimization.

Accenture Operations Poland

Data Analyst | 01/2018 – 04/2020

RESPONSIBILITIES

- Back-end customer support, including data review and adherence to client guidelines.
- Timely and high-quality delivery under agreed standards.
- Analyzed current events, generated improvement ideas and optimized workflows for a multinational client to enhance user experience.

ACHIEVEMENT

- Recognized as top "Innovator" of 2019, selected from 500+ employees, for multiple improvement ideas that impacted user experience, platform efficiency and the quality of support delivered to the client.

EMAG Warsaw

Junior Content Specialist | 09/2017 – 12/2017

RESPONSIBILITIES

- Development of product pages with photos, descriptions and technical specifications (SEM improvements).
- Standardization and validation of front-end product sites as part of regional projects.
- Research, data categorization and sorting of products in the high-tech group, specializing in PC components, desktops/laptops and smartphones.

Own Start-up – Forest Lovers

Founder | 01/2016 – 05/2017

- Established and ran a design-led floral business creating plant compositions known as "forests in a jar" — one of the first to introduce the trend in Poland. Managed the company end to end: product development, budget and fiscal management, and B2B client relationships including agencies and hospitality brands. Built the marketing channel to 8k+ social media followers.
